

THE UNIVERSITY OF KANSAS HOSPITAL ORTHOPEDICS

R. Sean Jackson, MD specializes in spinal diseases and disorders, including degenerative conditions, deformity, trauma, and tumors from cervical to lumbar spine. Trained at the University of Kansas School of Medicine, he completed his fellowship at the Charlotte Spine Center, NC.

E. Bruce Toby, MD chairs the Department and specializes in the care of the hand and upper extremity, including nerve, muscle, tendon and joint problems, and performs microsurgery. He trained at Wake Forest University and completed his fellowship at Duke Medical Center.

THE DEPARTMENT OF ORTHOPEDIC SURGERY at The University of Kansas Hospital is staffed by top-notch physicians who deliver specialized care for foot and ankle, hand, microsurgery, oncology, hip and knee, sports medicine, spine, trauma and pediatric patients; train medical students and residents; and serve as a referral source for complex tertiary orthopedic problems. The hospital honors three orthopedic physicians listed

in *Super Doctors*[®] 2011. All are board-certified by the American Board of Orthopaedic Surgery.

Greg A. Horton, MD specializes in foot and ankle surgery, total joint replacements and orthopedic traumatology. Trained at the University of Kansas Medical Center, he has completed two foot and ankle fellowships and served as investigator for an FDA study involving total ankle replacement.
