

**KELSEY-SEYBOLD CLINIC'S SUPER DOCTORS HONOREES**

NOT PICTURED: Maria Colome, MD, Dermatology; Kelly Bruce Lobley, MD, Pediatrics; Gwendolyn Williams, MD, Pediatrics

**Our Super Doctors are part of Houston's first Accountable Care Organization.**

Kelsey-Seybold was founded more than 60 years ago with the idea that physicians, trained in many different specialties, collaborate to provide quality care for their patients. It's the same accountable care model used by the Mayo Clinic for more than 100 years.

Our patient-centric approach has led Kelsey-Seybold to grow with Houston. We've invested in an electronic medical record system and web-based communications that unite our physicians and keep us close to our patients. We emphasize prevention and wellness, treating our patients with the same care and thoughtfulness that we give to our own families.

**Making Health Care Accountable**

As Houston's first and longest-standing Accountable Care Organization (ACO), Kelsey-Seybold continues to focus on developing long-term relationships with our patients and doing what it takes to be their Doctors for Life.

For our patients, this means:

- Your primary care physician is your trusted partner in prevention and ongoing health and well-being.

- The combined power of a high-caliber team of primary care physicians, medical specialists and nurses working together to coordinate your care.
- A focus on evidence-based medicine.
- A closer connection to your doctors, thanks to MyKelseyOnline, the web-based patient portal that lets you e-mail your doctor's office with security and privacy.

**National Recognition for Excellence**

Because Kelsey-Seybold physicians are accountable to our patients, our standards are high:

- More than 70 Kelsey-Seybold physicians have received the prestigious National Committee for Quality Assurance (NCQA) certification for excellence in diabetes care.
- Kelsey-Seybold's Cancer Center is the nation's first freestanding cancer treatment program to receive the American College of Surgeons' Commission on Cancer commended accreditation.

- Kelsey-Seybold's Radiology Department has been designated a Breast Imaging Center of Excellence. Our Breast Diagnostic Center is one of the nation's leading models for fast-tracking the diagnosis of breast cancer.

**Growing with Houston's Families**

Kelsey-Seybold makes staying close to our patients a top priority, so you can continue to count on us.

- There are now 20 Kelsey-Seybold Clinic locations throughout the greater Houston area, with two new locations in Pearland and Katy.

- Look for the relocation of Kelsey-Seybold's Downtown Doctors from 1 Houston Center to a new, larger space at The Shops at Houston Center in early 2011.
- Most Kelsey-Seybold Clinic locations have onsite laboratory and X-ray. Many also offer onsite diagnostic services such as EKG, mammography and MRI.
- Kelsey-Seybold Clinic accepts more than 70 health insurance plans, including CIGNA, United, Aetna, Blue Cross/Blue Shield and CHIP through Community Health Choice.
