In 1949, Dr. Kelsey believed in doctors working together to benefit patients. That's been our practice ever since.

Dr. Mavis Kelsey

When Dr. Mavis Kelsey came to Houston from the Mayo Clinic more than 60 years ago, he brought with him the most advanced clinical training in medicine and the vision of building a practice where doctors would collaborate to benefit patients and achieve better outcomes. His vision would not only become a reality, but the model for superior patient care.

Today, Kelsey-Seybold is Houston's most renowned, community-based physician group, home to more than 370 doctors trained in more than 50 medical specialties with an impressive network of 20 multispecialty care centers throughout the Houston area.

Dr. Kelsey believed in staying close to patients. The physicians who follow him do, too, using innovations like MyKelseyOnline to converse via secure email, 24/7 appointment scheduling, an after-hours nurse hotline, and an advanced electronic medical record system that unites doctors to their patients throughout the Kelsey-Seybold network.

As we look forward, we reflect proudly on the man with the vision to see the future. It is this vision—and an unwavering commitment to medical excellence—that continues to deliver quality care for our patients.

Nationally Recognized for Excellence

- The first and longest-standing Accountable Care Organization in Houston
- 16 multispecialty care centers named Patient-Centered Medical Homes by the National Committee for Quality Assurance (NCQA)
- More than 70 Kelsey-Seybold physicians with NCQA certification for excellence in diabetes care
- The Kelsey-Seybold Cancer Center—the nation's first freestanding cancer treatment program accredited by the American College of Surgeons' Commission on Cancer
