Chosen by Peers. Driven by Excellence.

CONGRATULATIONS TO THE KELSEY-SEYBOLD CLINIC HOUSTON PHYSICIANS NAMED TO SUPER DOCTORS[®].

At Kelsey-Seybold, we never stop looking for better ways to treat patients, improve outcomes and create a more effective model of healthcare. The drive for excellence is at the heart of everything we do, beginning with our doctors, specialists, nurses and every healthcare professional.

When our Kelsey-Seybold physicians were honored by their peers as *Super Doctors*, the best of the best, we were honored but not surprised.

Kelsey-Seybold doctors believe collaboration among all disciplines of medicine directly benefits patients and achieves better outcomes. We offer a model of healthcare that combines great doctors, patient convenience and value, with a coordination of care that's earned national recognition. It's what we call being KelseyConnectedSM.

For our doctors, KelseyConnected means the power of shared knowledge that allows them to work seamlessly as a tightly-knit team with the complete picture of a patient's health.

For patients, it means a connection to a caring and compassionate team of specialists who share their medical history through one electronic medical record (EMR) to coordinate care.

Being KelseyConnected means patients connect how and when they want with:

- The convenience of 20 locations.
- Multiple medical specialties and diagnostics all under one roof.
- The ability to email their doctor's office or speak with a nurse day or night, 7 days a week.
- 24-hour appointment scheduling and much more.

It's a model of care that has earned Kelsey-Seybold national recognition for excellence:

- The first and longest-standing Accountable Care Organization in Houston.
- 16 multispecialty care centers named Level 3 Patient-Centered Medical Homes by the National Committee for Quality Assurance (NCQA).
- The most physicians recognized by the NCQA in the state of Texas for excellence in diabetes care and heart and stroke care.
- The nation's first freestanding cancer treatment program—the Kelsey-Seybold Cancer Center—to receive multiple commendations by the American College of Surgeons' Commission on Cancer.

At Kelsey-Seybold, we salute each of our physicians and the passion they bring to patient care every day. It is their unwavering commitment to excellence that continues the legacy of our founder, Dr. Mavis P. Kelsey, Sr.

Kelsey-Seybold's Main Campus Clinic near the Texas Medical Center is one of 20 multispecialty care centers throughout the Houston area.
